

Innate Index

Results

The Innate Index is a brief personality inventory based on the five factor personality model that has been shown to be associated with a variety of school, life, career and relationship success outcomes.

The Innate Index is intended to provide you with information about key aspects of your personality and style. The eight factors of the Innate Index are briefly described below along with how you compare to others. The score represents the percentage of the population that score lower than you do on that personality factor.

<p>RESILIENCE: Resilience describes the extent to which an individual is emotionally calm, even tempered, hopeful, optimistic, able to cope with stress and generally happy.</p> <p>23%</p>	
<p>SENSITIVITY: Sensitivity describes the extent to which an individual is trusting, caring, cooperative, forgiving and agreeable in interacting with others.</p> <p>83%</p>	
<p>ACHIEVEMENT: Achievement describes the extent to which an individual is ambitious, conscientious, deliberate, disciplined, dependable, and achievement oriented.</p> <p>33%</p>	
<p>SELF CONFIDENCE: Self-confidence describes the extent to which an individual is confident, self-assured, poised, self-reliant, certain, decided, and in control.</p> <p>20%</p>	
<p>CHARACTER: Character describes the extent to which an individual is responsible, trustworthy, truthful, honest, direct and altruistic.</p> <p>72%</p>	
<p>SOCIABILITY: Sociability describes the extent to which an individual is gregarious, outgoing, social, friendly, extraverted and gets energized being around other people.</p> <p>48%</p>	
<p>ENERGY: Energy describes the extent to which an individual is energetic, playful, excitable, active, dynamic, lively, vivacious, animated, enthusiastic and tirelessness</p> <p>93%</p>
